VOLUME 1 ISSUE 1

MAY 1999

SPECIAL DUTY POSITION 222944 FILLED

Job Description: Single Point Manager to distribute and coordinate all USAF Immunizations Policy Guidance and procedures. Distance Learning CO-developer. Additional Duty: 4N0X1A Career Field Advisor.

Sad but true I have departed WHMC and now a member of AFMOA [Air Force Medical Operations Agency] I will work out of the School of Aerospace Medicine, Public Health division and be a part of the Communicable Disease team. I am truly ecstatic about this opportunity to educate our PH partners on the skills and duties as AF Vaccinologist. {Vaccinologist: A CDC borrowed term, can't find in a dictionary but used to describe all of those who support, deliver and perpetuate the delivery of vaccine}

This letter will replace the now debunked Aero-Extract Focus quarterly newsletter that WHMC training folks put out. The goal is to ensure awareness of updates in policies and procedures in the timeliest manner. It will not be used to pass guidance but point you to where you can find it.

In order to better our service I will call on most if not all of you for feedback and advise on, well advising the Policy Making Staff, what's broke, what's working and limits in meeting policy suspense.

There is an Official AF web site: <http://wwwsam.brooks.af.mil/web/eh/html/immune.htm> please visit it often, make suggestions, and send me things you think will help others. If you have your own web site at your base let me know, I'll add it as a link.

Upcoming highlights: Meeting with Col Freeman, A/I Advisor to the SG, CDC conference in Dallas, Manning, Training and rumor control.

TSgt "Odie" Stoll
